## More than just a glove

We are the official Scandinavian distributor for Supermax, the world's second largest manufacturer of nitrile gloves with an annual production of over 25 billion gloves spread over 11 factories in Malaysia.

Themsen Health is among the leading suppliers on the market and specializes in nitrile gloves, and has perhaps the largest selection on the market with 38 different types of gloves, in many colors and thicknesses, including a wide selection of latex and vinyl gloves.

We have over 20 years of experience in selling nitrile gloves, and have collectively delivered over 200 million gloves to the public sector and companies in Denmark and Sweden. We get the gloves directly from Supermax, without expensive intermediaries, which both ensures the best prices, but also ensures security of supply.

We only sell nitrile gloves of premium quality and all of our gloves meet applicable quality standards in the EU. All products are powder-free and latex-free of the highest quality with a maximum of 1 accelerator - namely zinc oxide, which ensures that allergic reactions do not occur.

At Themsen Health, your company can get an individually tailored annual agreement, with exactly the types of gloves in the sizes and quantities you need. We deliver at regular intervals over a period of time, so you are never in a situation where your glove inventory is at the bottom.

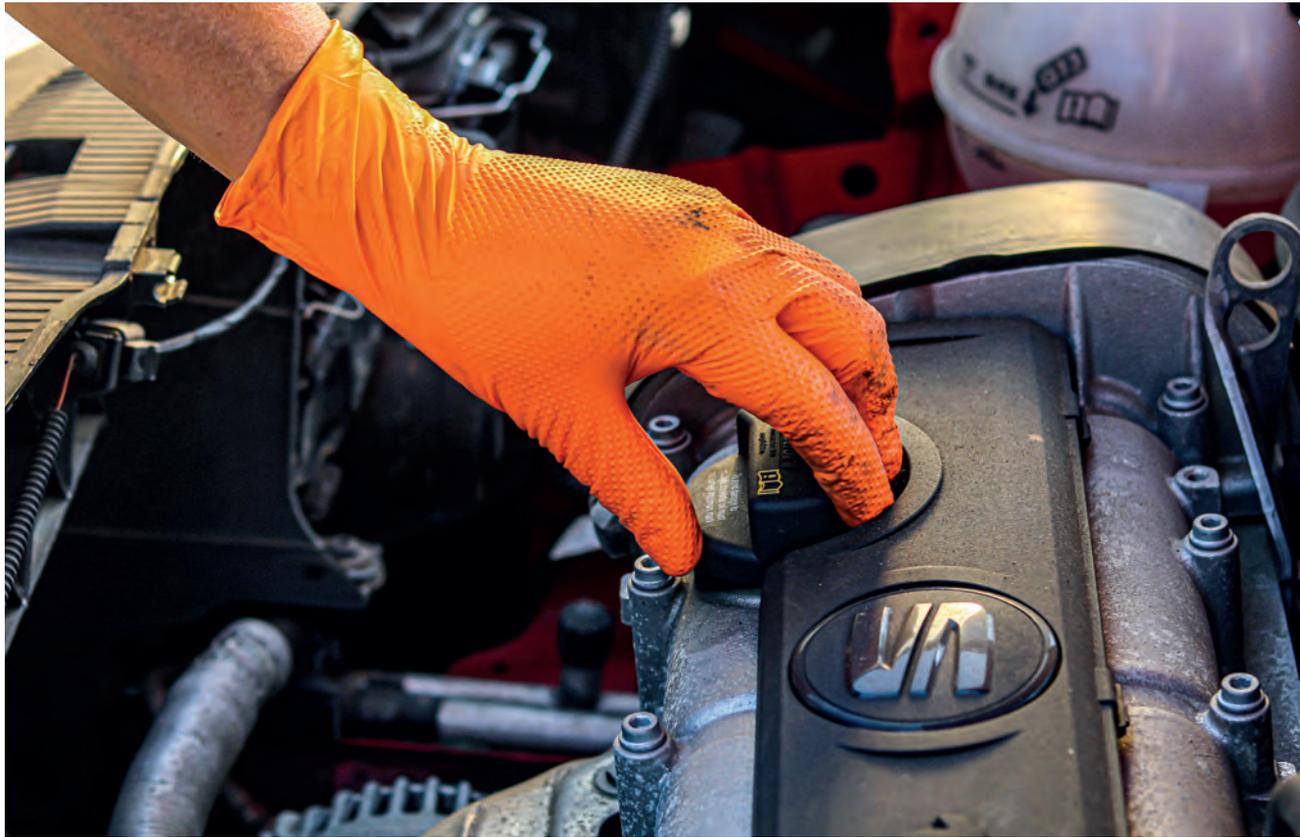

Our high level of service and delivery reliability is based on:

- **Serious advice on the right product**
- **Premium gloves of the highest quality**
- **Quality guarantee**
- **Security of supply**
- **Competitive prices**

Contact us for free samples at [info@themsenhealth.dk](mailto:info@themsenhealth.dk) or on phone +45 69 16 76 14.
